## Technical Skills

### Languages

- HTML
- CSS
- Javascript

### Technologies

- Node.js
- Express.js
- MySQL
- Sequelize

## Selected Works

### S.W.O.R.D

A superhero-themed project tracker, where citizens without a login can submit missions, and superheroes with a login can accept and change the status of missions.

Full Stack application using Express.js, MySQL and Sequelize, and Handlebars

<https://github.com/jcpickens0215/S.W.O.R.D>

### Simple Blog Site

A multi-user application where users can post blogs and comment on blogs.

Full Stack application using Express.js, MySQL and Sequelize, and Handlebars

<https://github.com/jcpickens0215/simple-blog>

### SpaceSearch

Search for images and videos of any celestial body known to NASA

Front-end application using Bulma, Moment.js, NASA Image and Video Library API, and NASA

Astronomy Picture Of the Day API

<https://github.com/jcpickens0215/SpaceSearch>

## **Simple Weather App**

Shows the current weather and 5 day forecast for a city you search for

Front-end application using Bulma, jQuery, Moment.js, and OpenWeatherMap APIs

<https://github.com/jcpickens0215/Simple-Weather-App>

## **Daily Schedule**

Plan your workday, hour by hour

Front-end application using Bootstrap, jQuery, and Moment.js

<https://github.com/jcpickens0215/Daily-Schedule>
